

CromoSEL FORTE

Performance Par-Excellence

The poultry bird's health, age, diet quality, safety and housing environment are intrinsic aspects that define the quality of laid eggs. The occurrence of broken eggs directly depends on the egg shell quality. It is important to consider that the problem of broken eggs is not due to a single factor but a combination of factors. Shell defects, irregularities in shell shape, texture and surface are commonly observed during a regular egg laying cycle and the causes are varied.

- The incidence of eggshell breakage and downgraded eggs remains elevated, despite improvements in shell quality by manipulation of nutritional, environmental and genetic factors (Hincke et al.,2000).
- It is possible to obtain significant reduction in the number of eggs lost due to the inferior quality of the shell attempting to an adequate nutrition, disease control, good management practices, and use of genetic lines with higher quality eggshell traits

CromoSEL Forte is a unique and ideal blend consisting of all the essential components which helps in the production cycle and maintains the performance and persistency in the laying birds.

CromoSEL Forte Consists of:-

Calcium & Phosphorus

Xanthophylls

Select Herbal Extracts

Vitamin D3

Organic Selenium

Essential Fatty Acids

Asphaltum

Vitamin C

Vitamin E

Chromium

Features of CromoSEL Forte:-

Calcium & Phosphorus	Highly available source for bone mineralisation, eggshell formation, muscle & nerve functions
Essential Fatty Acids (EFAs)	Omega 3, 6 sources of PUFAs, helps in maintaining cell integrity, egg quality and essential for immunity & optimum production
Xanthophylls	Enhances the egg yolk pigmentation
Asphaltum	Antioxidant, fertility promoter & immune booster
Herbal Extracts (Pueraria mirifica, Asparagus spp, Withania somnifera)	Rich sources of Antioxidants, phytoestrogens, improving nutrient metabolism & production performance
Vitamin C	Effective Anti-stress agent, Antioxidant & Immunostimulant
Vitamin D3	Essential for proper absorption & utilisation of Ca & P and improving bioavailability and homeostasis
Vitamin E	Biological Antioxidant, enhances immune response, exerts synergistic effect with Selenium
Organic Selenium	Higher absorption, Bioavailability & Stabilizes the Omega-3 PUFA & essential for growth and reproduction
Chromium	Essential mineral for improving quality of eggs & disease resistance

Benefits of CromoSEL Forte:-

- Increases the egg production and egg production cycle
- Improves the egg shell quality & egg size
- Enhances the pigmentation of egg yolk
- Aids in preventing oxidative stress during production cycle
- Helps in stimulate the immune system and develops disease resistance
- Reduces the incidence of thin egg shell breakages & defects

Free From Hormones & Antibiotics

Animal/Poultry Feed Supplement

Not For Medicinal use

Not For Human Use

Recommended Usage: 500 gm per MT of finished feed or as advised by a Nutritionist.

Presentation: 10 Kg

Catalyst LifeSciences Pvt. Ltd.

An ISO 9001:2015, ISO 14001:2015, HACCP Certified Company

DISPOSAL OF BAD AND OUTER PACKAGE: Do not contaminate water, food or feed by storage and disposal. Completely empty container into application equipment. Triple rinse pail and offer for recycling or reconditioning. Containers can also be disposed of in a sanitary landfill or by incineration, or in accordance with guidance from your local waste regulation authority, such as by burning (if burned, stay out of smoke). When applying this product to water bodies, avoid solid particles from falling on nearby ground where birds and feed may be present.
