

# ZEOTOXIN™

**A unique triple action mineral zeolite  
Fortified with probiotics**

The survival, growth and the yield quality of shrimps, prawns and fish depend upon the quality of pond water and the salinity levels, pH, H<sub>2</sub>S, CO<sub>2</sub> and other physiochemical parameters play a vital role for the desired yield of crop.

Excess feed, fecal matter, sudden increase and decrease of the algae and the microbial counts in the water determine the pond hygienic conditions and characteristics.

Zeotoxin™ is a microporous crystalline hydrated aluminosilicates, which because of its very unique physicochemical characteristics such as ion exchange and adsorption-desorption properties besides optimum concentrations of Silica, Alumina, oxides of Calcium and other minerals remains stable in water, forms a unique physiochemical parameter to detoxify the pond water.

# Zeotoxin™ provides unique benefits

## Optimum Adsorption

The powder form provides a vast surface area for adsorption of toxic gases and makes the habitat clean & healthy for the aquatic animals

## Desired Catalysis Levels

The unique blend purifies water & improves dissolved oxygen contents

## Cation Exchange Capacity

Exchanges ammonia & other poisonous gases in water & improves the soil and water quality and helps to prevent the occurrence of diseases

## Zeotoxin™ consists of:

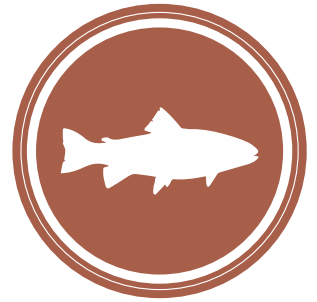

Mineral Zeolite	99.80%
SiO <sub>2</sub>	63.00 % to 66.00%
Fe <sub>2</sub> O <sub>3</sub>	1.80% to 2.00%
Al <sub>2</sub> O <sub>3</sub>	15.28% to 16.50%
CaO	10.00% to 12.00%
Other Minerals	QS
pH in 10% water	5.00

## Recommended Usage Levels:

10 Kg to 40 Kg of ZEOTOXIN™ per acre or as advised by an Aquaculture Technician

## Presentation:

10 Kg and 25 Kg

## Bacillus species 2,500,000 CFU per Kg

Free from hormones & antibiotics

Feed supplement for aquaculture use

Store in a cool and dry place

Keep out of reach of children

DISPOSAL OF BAD AND OUTER PACKAGE: Do not contaminate water, food or feed by storage and disposal. Completely empty container into application equipment. Triple rinse pail and offer for recycling or reconditioning. Containers can also be disposed of in a sanitary landfill or by incineration, or in accordance with guidance from your local waste regulation authority, such as by burning (if burned, stay out of smoke). When applying this product to water bodies, avoid solid particles from falling on nearby ground where birds and feed may be present.
