

CAMP Tab

Ultimate Source of Calcium for Dogs

Calcium is an essential building block for bones, and the balance of dietary calcium and phosphorus is especially important for young and growing animals. Pregnant and lactating dogs use high amounts of calcium to maintain the growing fetuses and produce enough milk to sustain the litter.

Calcium also plays a fundamental role in the transfer of information between cells and in the transmission of nerve impulses. For example, it plays essential roles in blood coagulation and muscular contraction as well as serving as a second messenger in a host of intracellular reactions.

CAMP Tab is a complete and balanced source of calcium designed especially for young puppies, pregnant and lactating animals thereby promoting the bone and general health and to prevent the development of calcium deficiency disorders.

CAMP Tab provided with

Elemental Calcium	672 mg
Elemental Phosphorous	520 mg
Elemental Magnesium	0.64 mg
Vitamin D3 IP	400 IU
Vit B12	20 mcg
Iron	3 mg

CAMP Tab offers following benefits

- Works synergistically with co-factors and exert its beneficial effects
- Highly essential for bone and cartilage formation in young animals

Beyond Innovations

DISPOSAL OF BAD AND OUTER PACKAGE: Do not contaminate water, food or feed by storage and disposal. Completely empty container into application equipment. Triple rinse pail and offer for recycling or reconditioning. Containers can also be disposed of in a sanitary landfill or by incineration, or in accordance with guidance from your local waste regulation authority, such as by burning (if burned, stay out of smoke). When applying this product to water bodies, avoid solid particles from falling on nearby ground where birds and feed may be present.
